SUMMARY

To work for a progressive organization in a highly motivating and challenging environment in the province of Performance Testing, Engineering that provides the best opportunities to grow and utilize my potential to the fullest while achieving organization goals.

IT EXPERIENCE

Total IT Experience of 8 Years. Have good knowledge on Performance results analysis, Performance Testing and Performance Test Life Cycle. Have exposure in design performance test approach, performance test plan creation, performance test strategy, performance test execution, monitoring resources and generate performance test report. Have experience of performance test reports analysis, monitoring system resource utilization, identifying performance bottlenecks and providing high level recommendations.

WORK EXPERIENCE:

Senior Performance Test Engineer, Esko Graphics Limited, June 2022-Current
Bangalore
WebCenter Performance Testing & Engineering
Duration: June 2022 – Present
Role: Performance Test Analyst / Performance Test Engineer
Domain: Enterprise Software
Location: Bangalore
Tools: JMeter, BlazeMeter, Chrome DevTools, Confluence, Performance Hub, AWS, Github, Bomgar
Project Description:
End-to-end performance testing of the WebCenter enterprise application, including performance baselining, load testing, release validation, SLA verification, bottleneck identification, and comparative analysis of new application releases.
Responsibilities:

- Developed and maintained performance test strategies, plans, scripts, and test data to ensure comprehensive testing coverage.
- Developed and enhanced **JMeter** scripts for key business workflows.
- Executed load, stress, endurance, and baseline tests using **JMeter and BlazeMeter**.
- Analyzed response time, throughput, error rates, and server/application performance metrics.
- Compared new releases against established baselines to identify performance regressions and improvements.
- Identified bottlenecks and performed root-cause analysis in collaboration with development and cross-functional teams.

- Responsible for monitoring and analyzing application and infrastructure performance using **Grafana, Dynatrace, and Windows PerfMon t**o identify bottlenecks, resource utilization issues, and performance degradation during load tests.
- Maintained performance documentation and test results using **Confluence and Performance Hub**.
- Conducted a POC using Grafana k6 to evaluate its capabilities for performance testing, scripting, workload execution, and performance metrics analysis.

Performance Test Analyst, Infosys Limited, January 2019-June 2022
Mysore
Duration: January 2019 – June 2022
Role: Performance Test Engineer / Performance Test Analyst
Domains: Insurance, Banking & Enterprise Applications
Location: Mysore
Tools: JMeter, NeoLoad, HP LoadRunner, HP Performance Center, BlazeMeter, Grafana, Dynatrace, Chrome DevTools, SQl, Fiddler, HTTPWatch, JIRA, HP ALM
Project Description:
End-to-end performance testing and certification of enterprise applications across Insurance, Banking, and Internal Services, covering performance baselining, workload modeling, release validation, and SLA verification.
Key Responsibilities:

- Gathered performance requirements, identified critical business workflows, and created **performance test plans and workloads**.
- Developed, enhanced, and reviewed performance scripts using **JMeter, NeoLoad, and HP LoadRunner**.
- Prepared test data and executed **load, stress, baseline, and release validation tests**.
- Established performance baselines and compared results across application releases to identify **performance degradation and improvements**.
- Analyzed **response time, throughput, transaction performance, errors, and SLA compliance**.
- Used **Grafana, BlazeMeter, Chrome DevTools, Fiddler, and HTTPWatch** for performance monitoring and bottleneck analysis.
- Identified performance bottlenecks and collaborated with development, infrastructure, vendor, and cross-functional teams for **root-cause analysis and resolution**.
- Raised and tracked performance defects, coordinated defect retesting, and validated fixes.
- Prepared **performance test and baseline comparison reports** and supported application performance certification.

CERTIFICATIONS

- AI Fundamentals — Google (Coursera)
- AWS Certified Cloud Practitioner — Amazon Web Services (AWS)
- NeoLoad Professional Certification — Tricentis

EDUCATIONAL BACKGROUND

B Tech
Mechanical Engineering, Government Engineering college, Thrissur January 2018
GPA: 7.4

Secondary School Leaving Certificate
Computer Science, Vivekodhayam Boy's Higher Secondary School, Thrissur March 2014

High School Diploma
St. Anton's High School, Pazhuvil March 2012

TECHNICAL EXPERIENCE SUMMARY

- 7+ years of experience in performance testing and engineering, with 5+ years of hands-on experience using Apache JMeter.
- Experienced in the end-to-end performance testing lifecycle, including requirement analysis, workload modelling, test planning, scripting, execution, monitoring, analysis, and reporting.
- Strong experience developing and enhancing JMeter scripts for web applications and web services using HTTP/HTTPS, REST, and SOAP protocols.
- Experienced in executing load, stress, endurance, baseline, and performance regression tests to validate SLAs and identify performance bottlenecks.
- 3+ years of experience using Dynatrace for application performance monitoring and bottleneck investigation, along with Grafana, Windows PerfMon, and BlazeMeter.
- Experience analysing response times, throughput, error rates, resource utilisation, and performance trends across application releases.
- Banking and insurance domain experience at Infosys, alongside enterprise application performance testing at Esko.
- Familiar with Java thread dump and heap dump analysis concepts for investigating application performance and JVM-related issues.
- Conducted a proof of concept (POC) using Grafana k6 to explore its performance testing capabilities.
- Experienced in Agile delivery, performance test reporting, root-cause investigation, and collaboration with development and infrastructure teams.
- Proficient in performance testing tools including Apache JMeter, Dynatrace, NeoLoad, HP LoadRunner, HP Performance Center, and BlazeMeter.

TECHNICAL SKILLS:

- Performance testing Tools: Neotys-Tricentis NeoLoad, JMeter, K6, HP LoadRunner, HP Performance Center, Blazemeter, Microsoft visual studio
- Mentored resources on performance testing
- Cross-functional collaboration
- Dedicated and focused, able to prioritize and complete multiple tasks and follow the process to achieve project goals

- Performance Monitoring/Other Tools: Perfmon, Blazemeter, Grafana, Dynatrace
- Protocols Used: Web (Http), Webservices, TruClient, REST, SOAP
- Workload modeling
- Adaptable to change
